

DISC Certification

2 Day Certification as certified behavioural consultant, featuring the DISC manual.

INTRODUCTION

The DISC Personality Certification introduces you to the field of human behavioural science in an easy to grasp presentation. The training focuses on the four personalities model of Dominance, Influence, Steadiness and Compliance, called DISC in short. Participants will learn how to read people, communicate more effectively, appreciate perspectives of people, motivate, avoid unnecessary conflicts and increase effectiveness. The real power of DISC, comes from its ability to interpret the relations between these dimensions. How a highly Influence person who has an equally high level of Dominance, will behave quite differently to an equally Influence individual without that Dominance. Using this information, DISC can be used to describe a person's general approach, including their motivations and dislikes, strengths and potential risks, and some of the basic assumptions they make about other people. The instrument is internationally used in the areas of Human Resource management, counseling, coaching, and consulting. On completion participants will be accredited as Certified Human Behaviour Consultant.
